

ResourceX - Help & Feedback Module (Final Proposal)

Purpose

Provide a simple Help & Feedback page where users of an organization can report issues, suggest improvements, and share feedback. The design is simple, practical, and suitable for the ResourceX project.

Why this module?

Organizations using ResourceX need an easy way to communicate problems and suggestions. This helps improve the platform and allows the ResourceX team to continuously enhance the system.

Page Structure

The Help & Feedback page contains only three sections:

1. Report an Issue
2. Suggest an Improvement
3. Share Feedback

1. Report an Issue

Purpose: Report problems while using ResourceX.

Examples: Login issue, Resource allocation error, Wrong resource information, System crash.

Fields:

- Issue Title
- Category
- Description
- Screenshot (Optional)
- Submit

2. Suggest an Improvement

Purpose: Allow users to suggest new features or improvements.

Examples: Calendar view, QR code support, Better dashboard, Notifications.

Fields:

- Suggestion Title
- Description
- Why is this useful?
- Submit

3. Share Feedback

Purpose: Collect user opinions and satisfaction.

Fields:

- Rating (1–5 Stars)
- Comment
- Submit

Workflow

User submits an Issue, Suggestion, or Feedback → Information is stored in the database → Admin reviews it → Developer or Support Team takes action if required.

Admin Dashboard

Dashboard Item	Description
Total Issues	All reported issues
Open Issues	Issues awaiting resolution
Resolved Issues	Completed fixes
Suggestions	Feature requests received
Average Rating	Overall user satisfaction

Database Tables

SupportRequest

requestId, organizationId, userId, title, category, description, attachment, status, createdAt

Feedback

feedbackId, organizationId, userId, rating, comment, createdAt

Conclusion

This Help & Feedback module is simple, easy to develop, and suitable for ResourceX. It provides a professional way for organizations to communicate issues, suggestions, and feedback without unnecessary complexity.
